Auxiliary Double Light

GS-0038

The GeoVISION™ Auxiliary Double Light is designed for supplemental lighting in large bores or bores with very dark walls. The Auxiliary Double Light mounts on the front of both the Standard Stainless Steel and CPVC cameras and is small enough to fit inside a 4 inch (10 cm) bore. They can also be used on a Standard Stainless Steel camera mounted on a Pan-Tilt Control.

Our lights are rated for depths of up to 2,000 feet (600 meters) underwater and pressures up to 1,000 psi.

Specifications:

Weight	10 Ounces (283 grams)
Diameter	4.25 inches (10.8 cm)
Length	6.5 inches (16.5 cm)
Maximum Depth	2,000 feet (600 meters)
Batteries	4 x AA Alkaline

Compatibility:

Standard Stainless Steel cameras

Standard Plastic cameras
